

# ENTERTAINMENT CENTRUM

Hyperbowling is a completely new way of bowling. You play on a real bowling alley and imagine yourself in a video game at the same time. Hit the colorful moving targets along the track to increase your score! The targets change, the levels change, and with a single ball, the winners change! HyperBowling is extremely exciting and a bit more active than Classic Bowling.

## HYPERBOWL

Hit the colored targets along the track and multiply your score. With one throw per player and increasing levels, it slowly becomes more exciting.

## HYPERBOWL PRO

Similar to Hyperbowl but with more challenge. Exciting levels and moving targets make the game even more exciting. This format has increasing scoring risks and is made for competitive players.

## HYPERSQUAD

Ultimate for corporate parties, couples and groups. Players split into two teams. The teams compete against each other and compete for the largest possible 'territory'. Each hit on the bumper illuminates that part in your team's color. Claim more of the bumpers and win!

## HYPERACTIVE

A game for kids, groups & children's parties. Rapidly changing targets and colors. Funny pictures of the players. But watch out for the red targets, because your score will be zero! With a combination of skill and luck, this game is perfect for everyone.
